In accordance with the Americans with Disabilities Act (“ADA”) and Section 286.26, Florida Statutes, persons with disabilities needing a reasonable accommodation or aids to access this document can call the public affairs division at (727) 796-2355 or (813) 996-7009, or email us at webmaster@tampabaywater.org. We are committed to accessibility and inclusion and will work with you to provide the information through a communication method that is accessible for you consistent with applicable law (for example, through telephone support).
INTRODUCTION
INTRODUCTION

The objective of this research study is to explore public attitudes regarding the following issues:

- Water Needs
- Tampa Bay Water
- Water Sources
- Reclaimed Water
- Conservation Programs
- Water Quality
- Water Cost
- Information Sources

A statistically valid internet survey of 1,200 randomly selected households in the Tampa Bay Water service area was conducted from August 20, 2021, to September 3, 2021.

The margin of error for responses from the three-county service area is 2.8 percentage points, and it is 4.9 percentage points for results from each county. Questions for the study emanated from past studies for Tampa Bay Water and from Tampa Bay Water management.

This report presents results from the 2015, 2018, and 2021 study aggregated for the entire service area and broken down by county. Comparisons to results from 2015 + 2018 are shown when appropriate.
KEY FINDINGS - HIGHLIGHTS

Water Needs
Over half of residents (51%) served by Tampa Bay Water believe that public officials are adequately meeting the drinking water needs for the region.
Nearly 4 in 5 residents (78%) believe there is enough water to meet their needs today. Only about 1 in 10 residents (12%) disagree.

Over 3 in 5 residents (64%) believe there will be enough water to meet their needs in 5 years, while only about 1 in 7 residents (15%) disagree.

Nearly half of residents (48%) believe there will be enough water to meet their needs in 10 years, while about 1 in 4 (23%) disagrees.

2 in 5 residents (41%) thinks there will be enough water to meet their needs in 15 years, while 26% disagree.
KEY FINDINGS - HIGHLIGHTS

Tampa Bay Water
TAMPA BAY WATER

- Aided recall of Tampa Bay Water is modest (23%) and has stayed steady since 2018

- Of those aware of Tampa Bay Water:
  - 82% agree that Tampa Bay Water is effectively supplying water to the region, an increase from 2018
  - 3 in 4 residents agree that Tampa Bay Water is concerned about the environment
  - 77% agree Tampa Bay Water is concerned about finding new sources of water to meet their needs
  - Over 7 in 10 (72%) agree that Tampa Bay Water helps governments cooperate on water problems
  - Nearly 7 in 10 residents (69%) agree that the agency is effectively developing water conservation programs that can lower water use
Of those aware of Tampa Bay Water:
- Over **3 in 5 residents (63%)** agree that the agency listens to the community and accepts ideas that may benefit the region
- Over **3 in 4 residents (77%)** believe that Tampa Bay Water helps protect the region’s water resources
- **3 in 5 residents (61%)** think Tampa Bay Water develops new water sources in an environmentally sound manner
- Nearly **7 in 10 residents (68%)** believe that Tampa Bay Water is concerned about climate change impacting water supplies, a significant increase from 2018
- Nearly **4 in 5 residents (78%)** rate Tampa Bay Water as being good, very good, or excellent at planning, developing, producing, and delivering high quality water supply to the area
KEY FINDINGS - HIGHLIGHTS

Water Sources
The Floridan Aquifer is the most frequently named source of water.

Springs (33%), reservoirs (29%), and surface water (27%) are also mentioned frequently as sources of water.

84% believe there should be more comprehensive rules and regulations to protect the region’s water resources.

3 in 5 residents (59%) believe more stringent source water protection regulations and investment in more advanced treatment technology should be used, in tandem.

55% who believe advanced treatment technology should be used would be willing to pay up to $5-$10 more per month.

KEY FINDINGS - HIGHLIGHTS

Reclaimed Water
**RECLAIMED WATER**

- **Over 2 in 5 residents (41%)** are willing to drink reclaimed water that has been cleaned to drinking water standards, then put back in groundwater, reservoirs, or rivers, then withdrawn and treated again to drinking water standards before being sent to homes and businesses. About **1 in 3 residents (32%)** are not willing to drink this water.

- **1 in 3 residents (34%)** are willing to drink reclaimed water that has been cleaned to drinking water standards and blended with other drinking water before being sent to homes and businesses, while nearly **2 in 5 residents (38%)** are not willing to drink water treated in this manner.

- **Nearly 2 in 5 residents (37%)** are willing to drink reclaimed water that has been put back to groundwater, reservoirs, or rivers then withdrawn and treated again before being sent to homes and businesses, while **35%** are not willing to do so.

- **1 in 3 residents (34%)** are willing to drink reclaimed water that has been put in a salty or non-drinking water zone of the aquifer to increase groundwater levels, resulting in a credit that can be used to withdraw groundwater several miles away at a different location, then be treated to drinking water standards, and sent to homes and businesses, while **31%** are not willing to do so.

KEY FINDINGS - HIGHLIGHTS

Water Cost
**WATER COST**

- **Nearly 2 in 5 residents (38%)** say that amount of their water bill affects the way they use water

- **Over half of residents (55%)** believe the cost of tap water is about right; **33%** of residents say the cost of tap water is too high
KEY FINDINGS - HIGHLIGHTS

Information Sources
INFORMATION SOURCES

- **Southwest Florida Water Management District** is the most trusted medium for reporting on water issues.

- Followed closely by residents' utility company in second and **Tampa Bay Water** in third.

- **Direct mail, email, and television** are the three media from which residents prefer to receive information about water issues.
KEY FINDINGS - HIGHLIGHTS

Demographics
The typical resident who participated in this study was consistent with the demographics profile of the region, they were:

- **53** years of age
- Registered to vote in the county (88%)
- Owns their own home (66%)
- Income of **$54,700**
- Female (63%)
DETAILED FINDINGS

Water Needs
Do you think public officials are adequately meeting the drinking water needs for your region?

- There has been virtually **no change** in the past three years in residents' views on the performance of public officials in meeting drinking water needs for the region.
WATER NEEDS BY COUNTY

Do you think public officials are adequately meeting the drinking water needs for your region?

- Over half of residents think public officials are adequately meeting the drinking water needs of their region.

- As in 2015 & 2018, Hillsborough County residents are more likely to hold this opinion (55%).
### Water Needs by Year

\(^1\) Asked only to residents who answered “no” or “Not sure” to previous question. Coded open-ended responses.

- Of the Tampa Bay residents who do not feel public officials are adequately meeting the drinking water needs for their region, most suggest **better water quality** or mention they are unsure but know something needs to be done.
Nearly 4 in 5 residents believe that there will be enough water to meet Tampa Bay region’s water needs presently.

Over 3 in 5 residents believe that there will be enough water to meet Tampa Bay region’s water needs in the next 5 years.

Nearly half of residents believe that there will be enough water to meet Tampa Bay region’s water needs in the next 10 years.

About 2 in 5 residents believe that there will be enough water to meet Tampa Bay region’s water needs in the next 15 years.

Considerably more residents believe there is/will be enough water to meet needs up to 15 years in the future than in previous years.
Now 2015 2018 2021

Over 3 in 4 Hillsborough County residents believe that there will be enough water to meet Tampa Bay region's water needs now.

Nearly 7 in 10 Hillsborough County residents believe that there will be enough water to meet Tampa Bay region's water needs in the next 5 years.

Half hold this opinion 10 years or more in the future.

There will be enough water to meet the Tampa Bay Region’s water needs in...
Top two boxes: Strongly Agree + Agree
Believe there is/will be enough water in Pinellas

- Over 3 in 4 Pinellas County residents believe that there will be enough water to meet Tampa Bay region's water needs now.

- Over 3 in 5 Pinellas County residents believe that there will be enough water to meet Tampa Bay region's water needs in the next 5 years.

- Fewer than half hold this opinion 10 years or more in the future.

1There will be enough water to meet the Tampa Bay Region’s water needs in...
Top two boxes: Strongly Agree + Agree
Pasco County residents are the most optimistic as they are most likely to believe there will be enough water to meet the Tampa Bay region’s needs, now and in the future.

Pasco County residents presented the highest percentage point increase from previous years to believe there will be enough water to meet the Tampa Bay region’s needs, now and in the future.

---

There will be enough water to meet the Tampa Bay Region’s water needs in...
Top two boxes: Strongly Agree + Agree
WATER SUPPLY AND THE ENVIRONMENT BY YEAR

In our area, drinking water is harvested and supplied without harming the environment.

- Over 2 in 5 residents (43%) agree drinking water is harvested and supplied without harming the environment in their area. This figure is 4% points lower than in 2018.

- Compared to other counties, Pinellas County residents were less likely to agree with this statement than in previous years.

1 Top two boxes: Strongly Agree + Agree
WATER SUPPLY AND THE ENVIRONMENT BY COUNTY

In our area, drinking water is harvested and supplied without harming the environment.¹

- **About 2 in 5** residents across the tri-county areas agree drinking water is harvested and supplied without harming the environment.

DETAILED FINDINGS

Tampa Bay Water
**AWARENESS BY YEAR**

Have you heard of Tampa Bay Water, the region's wholesale drinking water provider?

- **Awareness of Tampa Bay Water is 1% point higher than in 2018 (22%)**
AWARENESS BY COUNTY

Have you heard of Tampa Bay Water, the region's wholesale drinking water provider?

- Fewer than 1 in 4 residents have heard of Tampa Bay Water
- Of all the counties, Hillsborough residents are most likely to have heard of Tampa Bay Water (29%)
Over 4 in 5 residents (82%) who have heard of Tampa Bay Water agree that it is effective in supplying water to the region, this figure is 7% points higher than in 2018.
EFFECTIVELY SUPPLYING WATER BY COUNTY

Tampa Bay Water is effectively supplying water to the region\(^1\)

- Of residents who have heard of Tampa Bay Water, over **4 in 5** agree it is effectively supplying water to the region.
- Of all counties, **Pasco County** residents are more likely to disagree (13%) it is effectively supplying water to the region.

\(^1\) Only asked to those who have heard of Tampa Bay Water.
ENVIRONMENT CONCERN BY YEAR

Tampa Bay Water is concerned about the environment¹

- 3 in 4 residents (75%) who have heard of Tampa Bay Water agree that Tampa Bay Water is concerned about the environment, this is an 11% points increase from 2018.

¹ Only asked to those who have heard of Tampa Bay Water. Top two boxes: Strongly Agree • Agree
ENVIRONMENT CONCERN BY COUNTY

Tampa Bay Water is concerned about the environment

- Of residents who have heard of Tampa Bay Water, 3 in 4 agree it is concerned about the environment.

- Hillsborough County residents (80%) are more likely to agree that Tampa Bay Water is concerned about the environment.

1 Only asked to those who have heard of Tampa Bay Water.
NEW WATER SOURCES BY YEAR

Tampa Bay Water is concerned about finding new sources of drinking water to meet our needs¹

- Over 3 in 4 residents (77%) who have heard of it believe Tampa Bay Water is concerned about finding new sources of drinking water to meet the region’s needs, an increase of 12% points from 2018.

¹ Only asked to those who have heard of Tampa Bay Water. Top two boxes: Strongly Agree + Agree.
**NEW WATER SOURCES BY COUNTY**

Tampa Bay Water is concerned about finding new sources of drinking water to meet our needs.

- Of residents who have heard of Tampa Bay Water, over **3 in 4 agree it is concerned about finding new sources of drinking water**.

- Hillsborough County residents (80%) are more likely to agree, while Pasco County residents (72%) are less likely to agree that Tampa Bay Water is concerned about finding new sources of drinking water.

---

1 Only asked to those who have heard of Tampa Bay Water.
Tampa Bay Water helps local governments cooperate on solving drinking water challenges. 

- Just over 7 in 10 residents (72%) of Tampa Bay Water's service area who have heard of the organization believe it helps local governments cooperate on drinking water problems.

- In 2018, 58% of residents believed this statement.

---

1 Only asked to those who have heard of Tampa Bay Water.

NEW WATER SOURCES BY YEAR

Tampa Bay Water has developed new water sources in an environmentally sound manner.¹

- Just over 3 in 5 residents (61%) who are aware of Tampa Bay Water think that it has developed new water sources in an environmentally friendly fashion, this compares to 52% in 2018.

¹ Only asked to those who have heard of Tampa Bay Water. Top two boxes: Strongly Agree + Agree.
NEW WATER SOURCES BY COUNTY

Tampa Bay Water has developed new water sources in an environmentally sound manner

- Of residents who have heard of Tampa Bay Water, over **3 in 5** agree it has developed new water sources in an environmentally sound manner

- Hillsborough County residents (64%) are more likely to agree, while Pasco County residents (58%) are less likely to agree

---

1 Only asked to those who have heard of Tampa Bay Water.
Tampa Bay Water is concerned about climate change impacting water supplies.

- Of residents who are aware of Tampa Bay Water, **68% agree** that it is concerned about climate change impacting water supplies.
- In 2018, only **56% of residents agreed**.

---

1 Only asked to those who have heard of Tampa Bay Water. Top two boxes: Strongly Agree + Agree.
**CLIMATE CHANGE BY COUNTY**

Tampa Bay Water is concerned about climate change impacting water supplies:

- Of residents who have heard of Tampa Bay Water, nearly **7 in 10** agree it is concerned about climate change impacting water supplies.

- Hillsborough County residents (74%) are most likely to agree, while Pasco County residents (59%) are least likely to agree that Tampa Bay Water is concerned about climate change's impact on water supplies.

---

1. Only asked to those who have heard of Tampa Bay Water.
How would you rate Tampa Bay Water on how well it is planning, developing, producing and delivering high quality water supply to your area?1

- **Over 2 in 5 residents (44%)** who are familiar with Tampa Bay Water rate it “Excellent” or “Very Good” in planning, developing, producing, or delivering high quality water supplies to their area, this figure is an increase of 6% point from 2018.

- **Nearly 4 in 5 residents (78%)** give Tampa Bay Water an “Excellent,” “Very Good,” or “Good” rating on this dimension.

---

1 Only asked to those who have heard of Tampa Bay Water. Top two boxes: Excellent + Very Good.
RATE TAMPA BAY WATER BY COUNTY

How would you rate Tampa Bay Water on how well it is planning, developing, producing and delivering high quality water supply to your area?

- Of residents who have heard of Tampa Bay Water, nearly 4 in 5 would give Tampa Bay Water a rating of excellent, very good, or good for how well it is planning, developing, producing and delivering high quality water supply to the area.

- Pasco County residents (69%) are less likely to give Tampa Bay a “Good” or better rating on planning, developing, producing, and delivering high quality water supplies to their area.

- 85% of Hillsborough County residents give Tampa Bay Water a “Good” or better rating.

---

1 Only asked to those who have heard of Tampa Bay Water.

**Key Points**

- **Hillsborough residents (35%)** are slightly more likely to name surface water like lakes and rivers as a source of tap water.
- **Just 15% of residents** believe their drinking water comes from desalination of seawater with **16% of Hillsborough County residents** believing this assertion.

¹Multiple responses accepted.
There should be more comprehensive rules and regulations to protect the region’s water resources\(^1\)

- **Over 4 in 5 residents (84%)** in the Tampa Bay Water service area think there should be more comprehensive rules and regulations to protect the region’s water resources. **This result compares with 82% who felt this way in 2018**
RULES AND REGULATIONS BY COUNTY

There should be more comprehensive rules and regulations to protect the region's water resources

- A majority of residents agree there should be more comprehensive rules and regulation to protect the region's water resources (84%)

- Comparatively more Pasco County residents (86%) believe this, while only 82% of Pinellas County residents share this opinion
REGULATIONS VS TECHNOLOGY BY YEAR

Does it make more sense to protect drinking water quality through more stringent source water protection regulations or to invest in more advanced water treatment technology or both?

- Comparatively fewer residents in 2021 (59%) than in 2018 (72%) think it makes more sense to combine more stringent source water protection regulations with more investment in advanced treatment technology to protect drinking water quality than to take only one of these measures.
REGULATIONS VS TECHNOLOGY BY COUNTY

Does it make more sense to protect drinking water quality through more stringent source water protection regulations or to invest in more advanced water treatment technology or both?

- More residents (59%) believe that both measures should be used in tandem to protect drinking water.

- 24% of residents think only more advanced water treatment is the best approach, while 17% of residents think only more stringent regulations is the best approach to ensure drinking water quality.

- Comparatively more Pasco County residents (62%) believe that both measures should be used in tandem to protect drinking water.
WATER BILL BY YEAR

How much more would you be willing to pay each month on your water bill for water utilities to use more advanced water treatment technology?¹

- The average amount residents are willing to pay for more advanced treatment technologies is $7 per month, up $2 from 2018.
- Fewer residents are not willing to pay anything more to their utilities on their monthly bills to affect change, a decrease of 18% points from 2018.

¹ Only asked to those who selected “More advanced water treatment” or “Both” in previous question.
**WATER BILL BY COUNTY**

How much more would you be willing to pay each month on your water bill for water utilities to use more advanced water treatment technology?\(^1\)

- Among residents who support investment in more advanced treatment of water, **1 in 5 (21%) are not willing to pay anything more** to their utilities on their monthly bills to affect change.

- The average amount residents are willing to pay for more advanced treatment technologies is **$7 per month**.

\(^1\) Only asked to those who selected “More advanced water treatment” or “Both” in previous question.
Which of the following is the greatest threat to our region’s water resources?\(^1\)

- **Fertilizer** is the greatest threat to the region’s water resources according to residents of Tampa Bay Water’s service area was up 2% points from 2018.
- Development and growth decreased 4% points from 2018.

\(^1\)Multiple responses accepted.
### GREATEST THREAT BY COUNTY

Which of the following is the greatest threat to our region’s water resources?

CARE ABOUT WATER SOURCE BY YEAR

If new water supplies are added and your tap water remains the same quality or better, do you care what the source of that water would be?1

- More residents care what the sources of a new water supply would be from 2018, **up 4% points**

1 Question not asked in 2015.
CARE ABOUT WATER SOURCE BY COUNTY

If new water supplies are added and your tap water remains the same quality or better, do you care what the source of that water would be?

- Over 3 in 5 (64%) residents say they care what the source of new water supplies is
- Pasco County residents are most likely to hold this belief
I want to know where my water comes from
To make sure it is safe
To make sure it's a source I would be okay drinking from
To protect the environment
Other

Of those who said they care about a new source of water, nearly 2 in 5 residents say they want to know where their water comes from.

1 Only asked to those who said they care about the source of water. Question not asked in 2015. Coded open-ended responses.
DRINKING WATER SOURCES BY YEAR

Would you drink tap water that came from:  

- Groundwater from the Floridan Aquifer: 69% (2018), 81% (2021)
- River Water: 56% (2018), 66% (2021)
- Seawater: 53% (2018), 56% (2021)
- Reclaimed water: 30% (2018), 36% (2021)

Only 36% of residents who live in the Tampa Bay Water service area will drink reclaimed water, this is a 6% points increase from 2018. 

1 Question not asked in 2015.
Would you drink tap water that came from:

</tbody>
</table>

- **4 of 5 residents (81%)** claim they will drink **groundwater from the Floridan Aquifer**, while **2 in 3** will drink water from river water (66%) and over half from seawater (56%).

- Hillsborough County residents (43%) are more likely to drink reclaimed water, while Pasco County residents (30%) are less likely.
ACCEPTING A NEW WATER SUPPLY BY YEAR

Which of the following 3 is **most** important to you in deciding whether to accept a new water supply?

- Environmental stewardship
- Reliability
- Project costs

**Environmental stewardship** 39% 49%
Reliability 36% 38%
Project costs 13% 12%

About half of residents (49%) of Tampa Bay Water’s service area believe **environmental stewardship** is the **most important** consideration when deciding whether to accept a new water supply, **up 10% points from 2018**.

---

1Question not asked in 2015.
Which of the following 3 is **most** important to you in deciding whether to accept a new water supply?

- About half of residents (49%) of Tampa Bay Water’s service area believe **environmental stewardship** is the most important consideration when deciding whether to accept a new water supply.

- Environmental stewardship is **most important** to residents of Hillsborough County.

- Second in importance when deciding to accept a new water supply is **reliability** – 38% of residents of the Tampa Bay Water service area selected this factor as most important.
Which of the following 3 is least important to you in deciding whether to accept a new water supply?

- Least important in deciding whether to accept a new water supply is project costs
- Nearly 3 in 5 residents selected this option as least important when deciding whether to accept a new water supply option
DETAILED FINDINGS

Reclaimed Water
One way to reuse reclaimed water is to clean it to drinking water standards, then put it back in groundwater, reservoirs or rivers, then withdraw it and treat it again to drinking water standards before sending it to homes and businesses.

If water were treated in this manner, would you be willing to drink it?

- **About 2 in 5 residents** of the Tampa Bay Water service area will drink reclaimed water using this method, up **2% points from 2018**

- **Hillsborough County residents** are least likely to agree with this statement (78%)
PUBLIC OPINION BY YEAR

“Cleaned and treated reclaimed water may contain pharmaceutical byproducts”¹

- Concern about reclaimed water containing pharmaceutical byproducts decreased 2% points

¹ Top two boxes: Strongly Agree + Agree
PUBLIC OPINION BY COUNTY

“Cleaned and treated reclaimed water may contain pharmaceutical byproducts”

- **Over 3 in 4 residents** agree, “cleaned and treated reclaimed water may contain pharmaceutical byproducts”
- **Pinellas County residents are more likely to agree** with this statement (80%)
- **Hillsborough County resident are least likely to agree** with this statement (73%)
PUBLIC OPINION BY YEAR

“Using cleaned and treated reclaimed water may cost more”¹

- Belief that using cleaned and treated reclaimed water may cost more increased by 1% point from 2018

¹Top two boxes: Strongly Agree + Agree
PUBLIC OPINION BY COUNTY

“Using cleaned and treated reclaimed water may cost more”

- About 3 in 4 residents agree, “using cleaned and treated reclaimed water may cost more”
- Pinellas County residents are more likely to agree with this statement (76%)
PUBLIC OPINION BY YEAR

“The concept of cleaned and treated reclaimed water just makes me uncomfortable”¹

- More people were uncomfortable with the concept of cleaned and treat reclaimed water, an increase of 2% points

¹Top two boxes: Strongly Agree + Agree
PUBLIC OPINION BY COUNTY

“The concept of cleaned and treated reclaimed water just makes me uncomfortable”

- Over 7 in 10 residents agree, “the concept of cleaned and treated reclaimed water just makes me uncomfortable”

- Residents are more likely to strongly agree, “the concept of cleaned and treated reclaimed water just makes me uncomfortable” over other public opinion statements

- Hillsborough County residents are least likely to agree with this statement (68%)
Over 3 in 5 residents (62%) agree, "reclaimed water may harm the aquifer"
Public Opinion by County

“Reclaimed water may harm the aquifer”

- Over 3 in 5 residents agree, "reclaimed water may harm the aquifer"
- Pasco County residents are more likely to agree with this statement (68%)
- Hillsborough County residents are least likely to agree with this statement (57%)
More residents find it completely acceptable to use reclaimed water for gardening and landscaping, up 5% points from 2018.

1 Question not asked in 2015.
Over 3 in 5 residents of Tampa Bay Water's service area will completely accept reclaimed water in a gardening and landscaping context.
More residents find it completely acceptable to use reclaimed water for irrigation, up 5% points from 2018.
**Acceptable Uses for Reclaimed Water by County**

Irrigation

- **3 in 5 residents** of Tampa Bay Water’s service area will completely accept reclaimed water in an irrigation context.

- Residents of **Pinellas County (64%)** were more likely to find irrigation a completely acceptable use for reclaimed water.
More residents find it completely acceptable to use reclaimed water for industrial use, up 5% points from 2018.

1 Question not asked in 2015.
Over half of residents of Tampa Bay Water’s service area will completely accept reclaimed water in an industrial use context.

Residents of Hillsborough County (56%) were more likely to find irrigation a completely acceptable use for industrial use.

**ACCEPTABLE USES FOR RECLAIMED WATER BY COUNTY**

- **Industrial use**

Completely Acceptable uses for reclaimed water by year

Household use, such as laundry, showers, and dishwashers

- More residents find it completely acceptable to use reclaimed water for household use, up 6% points from 2018

1 Question not asked in 2015.
Over 1 in 3 residents of Tampa Bay Water’s service area will completely accept reclaimed water in a household use context.

Residents of Hillsborough County (40%) were more likely to find irrigation a completely acceptable use for household use.
More residents find it at least somewhat acceptable to use reclaimed water for drinking, up **8%** points from **2018**
**ACCEPTABLE USES FOR RECLAIMED WATER BY COUNTY**

**Drinking water**

- **Fewer than 1 in 5 residents** of Tampa Bay Water’s service area will completely accept reclaimed water for **drinking**.

- Hillsborough County residents are **more likely** to completely or somewhat accept reclaimed water for **drinking water**.
DETAILED FINDINGS

Conservation Programs
Williness to participate in landscape education and design courses was up slightly from 2018.
Nearly 9 in 10 residents are at least somewhat willing to participate in a landscape education and design course conservation program.

Hillsborough County residents are slightly more willing to participate (65%).
CONSERVATION PARTICIPATION BY YEAR

Landscape/Florida-friendly landscaping evaluations¹

- Willingness to participate in landscape/Florida-friendly landscaping evaluations stayed steady from 2018.

¹ Question not asked in 2015.
CONSERVATION PARTICIPATION BY COUNTY

Landscape/Florida-friendly landscaping evaluations

- **9 in 10 residents** are at least somewhat willing to participate in a landscape/Florida-friendly landscaping evaluation conservation program.

- Residents of Pasco County are most likely to be at least somewhat willing to participate in a landscape/Florida-friendly landscaping evaluations program (93%).
CONSERVATION PARTICIPATION BY YEAR

Cash or financial incentives for replacing toilets with low-flow or water efficient toilets¹

- Willingness to participate in cash/financial incentives for replacing toilets increased from 2018 by 5% points

¹ Question not asked in 2015.
CONSERVATION PARTICIPATION BY COUNTY

Cash or financial incentives for replacing toilets with low-flow or water efficient toilets

- Over 9 in 10 residents are at least somewhat willing to participate in a cash or financial incentive for replacing toilets with low-flow or water efficient toilet conservation program.
- Residents of Pasco County are most likely to be at least somewhat willing to participate in a cash/financial incentive to replace toilets (96%).
CONSERVATION PARTICIPATION BY YEAR

Cash or financial incentives for installing irrigation control devices, such as rain or soil moisture sensors\(^1\)

- Willingness to participate in cash/financial incentives to install irrigation control devices **was up 4% points from 2018**

\(^1\) Question not asked in 2015.
CONSERVATION PARTICIPATION BY COUNTY

Cash or financial incentives for installing irrigation control devices, such as rain or soil moisture sensors

- **9 in 10 residents** are at least somewhat willing to participate in a **cash or financial incentive for installing irrigation control devices, such as rain or soil moisture sensor** conservation program.

- Residents of Hillsborough County are slightly more likely to be at least somewhat willing to participate in a cash/financial incentive to install irrigation control devices (92%).
CONSERVATION PARTICIPATION BY YEAR

Cash or financial incentives for putting in shallow irrigation wells to replace tap water for irrigation¹

- Willingness to participate in cash/financial incentives to replace shallow irrigation wells to replace tap water for irrigations was up 4% points from 2018

¹ Question not asked in 2015
Nearly 9 in 10 residents are at least somewhat willing to participate in a cash or financial incentive for putting in shallow irrigation wells to replace tap water for irrigation conservation program.

Residents of Hillsborough County are slightly more likely to be at least somewhat willing to participate in a cash/financial incentive to put in shallow irrigation wells (89%).
Technical assistance for improving the efficiency of your existing irrigation system or practices.

Willingness to participate in technical assistance for improving the efficiency of existing irrigation was up 4% points from 2018.

Question not asked in 2015.
CONSERVATION PARTICIPATION BY COUNTY

Technical assistance for improving the efficiency of your existing irrigation system or practices

- 9 in 10 residents are at least somewhat willing to participate in a technical assistance for improving the efficiency of the existing irrigation system conservation program.
The conservation program that gained the most traction with residents of Tampa Bay Water’s service area is using reclaimed water for sprinkling/lawn watering as 45% are very willing and 77% are at least somewhat willing to try this form of conservation.

This was a slight increase from 2018.

1 Question not asked in 2015.
CONSERVATION PARTICIPATION BY COUNTY

Reclaimed water for sprinkling/lawn watering

- Over 9 in 10 residents are at least somewhat willing to participate in a reclaimed water for sprinkling/lawn watering conservation program.
DETAILED FINDINGS

Water Quality
The percentage of residents who say they drink tap water is down from 56% in 2018 to 53% in 2021.

This percentage is the lowest recorded figure in a decade.
Over half of residents (53%) drink household tap water.

Pinellas County residents are slightly more likely to drink household tap water (56%).
Why don’t you drink your tap water?\(^1\)

- **Taste** is the number one reason why people do not drink tap water, the percentage listing this reason is up 13% points since 2018.

\(^1\)Multiple responses accepted. Only asked to those who do not drink household tap water.
DRINK TAP WATER BY COUNTY

Why don’t you drink your tap water?¹

- **Taste** (59%) is the number one reason why people do not drink tap water.

- When factoring in the taste of bottled water, significantly more residents in 2021 selected this reason for not drinking tap water (57%).

---

¹Multiple responses accepted. Only asked to those who do not drink household tap water.
Just over 3 in 5 residents (61%) think bottled water is safer than tap water, up from 53% who believed this in 2018.
TAP WATER SAFETY BY COUNTY

Believe bottled water is safer than tap water

- 3 in 5 residents (61%) believe bottled water is safer than tap water.
- Pasco County residents (66%) are more likely to think bottled water is safer, while Pinellas County residents (56%) are least likely.
TAP WATER SATISFACTION BY YEAR

Tap water satisfaction¹

- The graph shows residents' average ratings for tap water (on a 5-point scale) on six characteristics
- Scores went down across all attributes from 2018

¹ On a scale of 1 to 5, with 5 being Very Satisfied and 1 being Very Unsatisfied.
The taste of tap water is rated a low 2.9 on a 5-point scale, while appearance (3.5), odor (3.3), safety (3.2), cost (3.2), and purity (3.1) of tap water are rated higher than taste.

Pinellas County residents gave the highest rating across all categories except for cost.
DETAILED FINDINGS

Water Cost
Does the amount of your water bill affect the way you use tap water?

- Fewer residents feel the cost of their water bill affects the way they use tap water, down 5% points from 2018.
Just under 2 out of 5 residents (38%) maintain that their water bill affects the way they use tap water.
Given what you pay and what you receive, would you say the cost of your tap water is too high, about right, or lower than you expect?

- Fewer residents (33%) of Tampa Bay Water’s service area feel tap water prices are too high, this feeling is down 9% points since 2018.
WATER COST BY COUNTY

Given what you pay and what you receive, would you say the cost of your tap water is too high, about right, or lower than you expect?

- Based on what they pay, **1 out of 3 residents (33%)** of Tampa Bay Water’s service area feel tap water prices are too high.

- **Pinellas County residents (39%)** are more likely to think the price of tap water is too high.

- **Hillsborough County residents (25%)** are least likely to feel this way.
DETAILED FINDINGS

Information Sources
Which of the following sources do you feel are trustworthy when reporting on water issues?¹

- Television, which was the most trusted source in 2018, fell to the fourth spot

- Trust in sources of information dropped across the board, with the exceptions of Southwest Florida Management District, residents' utility company, and Tampa Bay Water

¹Multiple responses accepted.
TRUSTWORTHY SOURCES BY COUNTY

Which of the following sources do you feel are trustworthy when reporting on water issues?¹

- **Southwest Florida Water Management District (43%)** is the most trusted source for reporting on water issues.

- **Residents' utility company (41%)** is second and **Tampa Bay Water (38%)** third.

- Social media sources fared poorly as only **8% listed Facebook** and **5% listed Twitter** as trusted sources for water issues.

---

¹Multiple responses accepted.
There were decreases across all information sources from previous years, suggesting residents may not be interested in receiving any information whatsoever or have no preference to the medium in which this information is received.

1 Multiple responses accepted.
How do you prefer to receive information about water resource issues and projects?\(^1\)

- **Direct mail (40%)**, email (34%), and television (33%) are the three media from which residents prefer to receive information about water issues.

Introduction

The objective of this research study is to explore public attitudes regarding the following issues:

- Water Needs
- Tampa Bay Water
- Water Sources
- Reclaimed Water
- Conservation Programs
- Water Quality
- Water Cost
- Information Sources

- A statistically valid internet survey of 1,200 residents
- Representative of the Tampa Bay Water service area
- Data Collection: August 20, 2021, to September 3, 2021
- Margin of error for the overall results: 2.8%
- Margin of error for county results: 4.9%
Which of the following is the greatest threat to our region's water resources? ¹

- **Fertilizer**: The greatest threat to the region's water resources according to residents of Tampa Bay Water's service area was up 2% points from 2018.

- **Development and growth**: Decreased 4% points from 2018.

¹Multiple responses accepted.
Care about water source by year

If new water supplies are added and your tap water remains the same quality or better, do you care what the source of that water would be?¹

- Yes: 60% in 2018, 64% in 2021
- No: 40% in 2018, 36% in 2021

More residents care what the sources of a new water supply would be from 2018, up 4% points.

¹ Question not asked in 2015.
Care about water source by year

If yes, why is the source important to you?¹

- Of those who said they care about a new source of water, nearly 2 in 5 residents say they want to know where their water comes from.

Drinking water sources by year

Would you drink tap water that came from:¹

- **Groundwater from the Floridan Aquifer**
  - 2018: 69%
  - 2021: 81%

- **River Water**
  - 2018: 56%
  - 2021: 66%

- **Seawater**
  - 2018: 53%
  - 2021: 56%

- **Reclaimed water**
  - 2018: 30%
  - 2021: 36%

Only 36% of residents who live in the Tampa Bay Water service area will drink reclaimed water, this is a 6% points increase from 2018.

¹ Question not asked in 2015.
Drinking water sources by county

Would you drink tap water that came from:

- 4 of 5 residents (81%) claim they will drink groundwater from the Floridan Aquifer, while 2 in 3 will drink water from river water (66%) and over half from seawater (56%)

- Hillsborough County residents (43%) are more likely to drink reclaimed water, while Pasco County residents (30%) are less likely
Accepting a new water supply by year

Which of the following 3 is most important to you in deciding whether to accept a new water supply?

- Environmental stewardship
- Reliability
- Project costs

About half of residents (49%) of Tampa Bay Water’s service area believe environmental stewardship is the most important consideration when deciding whether to accept a new water supply, up 10% points from 2018.

¹Question not asked in 2015.
About half of residents (49%) of Tampa Bay Water’s service area believe environmental stewardship is the most important consideration when deciding whether to accept a new water supply.

Environmental stewardship is most important to residents of Hillsborough County.

Second in importance when deciding to accept a new water supply is reliability – 38% of residents of the Tampa Bay Water service area selected this factor as most important.
Accepting a new water supply by county

Which of the following 3 is least important to you in deciding whether to accept a new water supply?

- Least important in deciding whether to accept a new water supply is project costs
- Nearly 3 in 5 residents selected this option as least important when deciding whether to accept a new water supply option.
